73 ENERGY

CORPORATE PROFILE

Principal Trading | Marine Fuels • Energy • Industrial Metals • Agriculture • Carbon

Version 1.1 · November 2026

1. Who We Are

73 Energy is a principal-led commodity trading house specializing in physical energy, industrial materials and agricultural commodities. We are principals, not intermediaries: we take title to the commodities we trade and carry the commercial risk. We buy, finance and deliver physical cargoes to shipping companies, food manufacturers, industrial end-users and trading counterparties.

2. Vision & Mission

Our Vision: To architect the modern energy supply chain with institutional precision and entrepreneurial speed.

Our Mission: To originate, structure and execute commodity transactions as a trusted principal trader, moving energy, metals and agricultural products from producers to industrial end-users with discipline, transparency and speed.

3. Commercial Divisions

73 Energy's trading mandate is organized into five commercial desks:

I. Marine Energy & Bunkering

Principal supply of VLSFO, LSMGO and biofuels to vessel operators, with a focus on the Suez Canal and Mediterranean region. Product is purchased from refineries and supplied to ISO 8217 specification, in stem sizes of 500–5,000 MT at major hubs.

II. Industrial Raw Materials (Dry Bulk)

Principal purchase and sale of iron ore, coal and steel raw materials, managing the movement from mine to port for industrial end-users in Asian and European markets.

III. Refined & Structured Energy Products (Liquids & Gas)

Principal trading of crude oil, distillates (diesel, gasoline, jet fuel), LNG and LPG. Physical delivery is supported by paper hedging overlays using exchange-traded derivatives to manage price volatility.

IV. Agricultural & Soft Commodities

Physical origination and merchandising of grains (wheat, corn, soybeans), vegetable oils and fertilizers (urea, ammonia) under origin-specific contracts, with documented origin and certification.

V. Carbon & Environmental Markets

Integration of environmental compliance, including EU ETS and ISCC requirements, with physical fuel procurement for vessel owners, supporting compliance with evolving maritime regulation.

4. Our Story: The “73” Code

Built on a Code of Clarity. Our name comes from the universal language of the sea. In the era of maritime telegraphy, ‘73’ was the standard wire code for ‘Best Regards’, a signal of professional courtesy and mutual respect between officers across the open ocean. Today, 73 Energy applies the same ethos to modern commodity trading, acting as the clear signal in a market often clouded by noise and volatility.

5. The Business Model: Principal Execution

We execute back-to-back physical transactions in which we own the commercial risk.

- **Source:** Direct purchase from producers, including refineries, mines, farms and origin suppliers.
- **Finance:** Transactions supported by structured trade finance (LC, SBLC, DLC) and institutional credit facilities.
- **Deliver:** Full-cycle logistics and risk management from origin to end-user.
- **Profit:** Margin capture driven by market intelligence and disciplined execution.

6. Core Values

- **Commercial Governance:** We operate with the discipline of a financial institution and the agility of a trading desk. Compliance is not a checkbox; it is our licence to operate.
- **Physical Mastery:** We do not trade on screens alone. We understand the physical reality of the molecule and the vessel, and we solve the logistics that others ignore.
- **Transparent Dealing:** We deal as principal with producers and consumers alike, on clear terms and with transparent execution.

7. Compliance & Governance

73 Energy does not participate in sanctioned or high-risk corridors. Counterparties are subject to KYC and AML verification and sanctions screening, including OFAC and OFSI, before transacting. Transactions are documented under standardized international contracts such as GAFTA, FOSFA and Incoterms 2020 and are supported by structured trade finance. Director and beneficial ownership information is provided to counterparties as part of onboarding.

8. Corporate Information

Trading name	73 Energy
Legal entity	Mergershare Ltd, a private limited company registered in England and Wales
Company number	14343247
Registered office	182-184 High Street North, East Ham, London E6 2JA, United Kingdom
