73 ENERGY | CORPORATE PROFILE & IDENTITY

1. THE BRAND IDENTITY

Tagline: Proprietary Trading | Marine Fuels • Energy • Industrial Metals • Agriculture • Carbon

Elevator Pitch: 73 Energy is a proprietary commodity trading house specializing in physical energy, industrial materials, and agricultural commodities. We are **PRINCIPALS**, not intermediaries. We buy, finance, and deliver physical cargoes to global shipping companies, food manufacturers, industrial end-users, and trading desks, bridging the gap between physical resources and market governance.

2. VISION & MISSION

Our Vision: "To be the global architect of the energy supply chain, seamlessly integrating physical resources with regulatory governance."

Our Mission: "To originate, structure, and execute complex commodity transactions as a trusted principal trader. We combine institutional precision with entrepreneurial speed to move energy, metals, and agricultural products from producers to industrial end-users."

3. COMMERCIAL DIVISIONS (The Operational Pillars)

73 Energy functions as a unified trading house with five dedicated commercial desks:

I. Marine Energy & Bunkering

We control downstream logistics for vessel operators, specializing in the Suez Canal and Mediterranean supply chains. We buy VLSFO, MGO, and biofuels from refineries to deliver ISO-8217 compliant stems (500–5,000 MT) at major hubs, optimizing price and timing.

II. Industrial Commodities (Dry Bulk)

Connecting producers, miners, and industrial end-users. We facilitate secure transactions and logistics for Iron Ore, Coal, and Steel, managing mine-to-port movements from global origins to Asian and European markets.

III. Energy Products (Liquids & Gas)

Principal trading and hedging of Crude Oil, Distillates (Diesel, Gasoline, Jet Fuel), LNG, and LPG. We execute physical delivery with paper hedging overlays through ICE/CME derivatives to manage market volatility.

IV. Agricultural & Soft Commodities

Global merchandising of Grains (Wheat, Corn, Soybeans), Vegetable Oils, and Fertilizers (Urea/Ammonia). We specialize in origin-specific contracts with full certification compliance,

ensuring quality from farm to factory.

V. Regulatory Markets (Carbon & Compliance)

We act as a compliance partner for Environmental Certification and Carbon Allowances. We allow owners to bundle regulatory compliance (EU ETS/ISCC) with physical fuel procurement to navigate evolving maritime regulations.

4. OUR STORY (The "73" Code)

Built on a Code of Clarity. Our name is derived from the universal language of the sea. In the era of maritime telegraphy, '73' was the standard wire code for 'Best Regards'—a signal of professional courtesy and mutual respect sent between officers across the open ocean. Today, 73 Energy applies that same ethos to modern commodity trading, acting as the clear signal in a market often clouded by noise and volatility.

5. THE BUSINESS MODEL: PRINCIPAL EXECUTION

We execute back-to-back physical transactions where we own the commercial risk:

- **SOURCE**: Direct off-take from refineries, mines, farms, and producers.
- **FINANCE**: Utilization of institutional trade credit facilities (Macquarie, Bibby Financial) for high-velocity execution.
- **DELIVER**: Full-cycle logistics and risk management from origin to end-user.
- **PROFIT**: Margin capture driven by market intelligence and execution precision.

6. CORPORATE GOVERNANCE & LEGAL

Structure: 73 Energy operates as a specialized commercial desk of Mergershare Ltd, a UK-registered entity. This structure offers our clients the agility of a specialized trading desk backed by the governance and compliance framework of an established limited company.

Legal Footer: *73 Energy is a trading name of Mergershare Ltd. Registered in England & Wales No. 14343247. Registered Office: 182-184 High St N, London E6 2JA, United Kingdom.*
